HELPING TO SHELTER THE ASSETS OF YOUR GROWING BUSINESS

Growing crops is what you do, building greenhouses is what we do. But we like to say that we grow something too — a relationship with our customers. From vegetables to flowers and from nursery stock to tree seedlings, we can look after all your greenhouse needs.

Your current and future success depends on reliable, high-quality greenhouses, greenhouse systems, and greenhouse supplies. We are your source for these products as well as the expertise to build and service them.

We have over 20 years of experience and have invested heavily in machinery, infrastructure, and employee development. Your greenhouse will be built expertly, on time, and with the highest quality components.

DESIGNED FOR YOUR NEEDS

We can be your partner from the moment you start thinking about a project to the moment the greenhouse is ready for production, and for years beyond. We have been surrounded by horticulture for most of our lives. It is almost second nature to us and we would love to discuss it with you.

Our qualified team, including a mechanical and a horticulture engineer, will design internal systems based on the crop you want to grow and your specific wishes.

We will ensure your greenhouse is built efficiently and safely. Our experienced crews install curtain, lift, and irrigation systems if needed. Our partner subcontractors will install heating, electrical and computer systems according to our design and under our supervision.

THE DUTCH CONNECTION

It is well known that The Netherlands is the hotbed of greenhouses and the incubator of many innovative ideas related to the industry. Our long-term relationships with Dutch suppliers and status as an official agent of Prins Dokkum, Snelder, Berg, Vandenberg, Zantingh, Reldair, Verhagen, and Green Meteor, gives you a direct connection to the leading edge of the industry.

A LASTING RELATIONSHIP

If you want to update or improve on your systems or add onto a greenhouse, we are here to help you. We can provide you with advice and materials guaranteed to fit with your existing greenhouse and systems. When the time comes that your greenhouse requires some maintenance or repairs, our service crews are ready. It is all part of growing and maintaining a lasting relationship with our customers.

WE WILL TAKE CARE OF IT

One of our strengths is turn-key greenhouses. We work together with you to design and build the greenhouse that is best suited for your specific needs.

A RELIABLE SUPPLIER

We carry only the highest quality components and keep essential parts in stock at our warehouse so you are never left short-handed.

We supply and install:

- Internal transportation
- Greenhouse automation
- Concrete works
- Assimilation lighting
- Grow lights
- Tube rail carts
- Monorail carts
- Container systems
- Sulphur burners
- Flower processing machines
- Mist systems
- Horizontal air fans
- Sprayers
- Circulation pumps
- Mixing valves
- Drip irrigation
- Drain gutters
- CO2 tubing
- Miscellaneous supplies
